NDE near death experience  
PLR past life review and/or past life regression  
PPP pre-incarnation planning process  
ZPF zero point field

## Introduction – Human Design System

The Human Design System (HDS) is an information system of behavioral genetics that has a foundation and structure based in quantum physics (neutrino stream), which discloses our natural behavioral patterns on an individual basis.

The neutrino is the smallest known particle of matter...makes an atom look like a mountain. Each second, billions of neutrinos, referred to as the neutrino stream, pass through every square inch of the human energy field (HEF or aura) and physical body. At the time of birth, and eighty eight days prior thereto, there is an energetic imprinting on our HEF by the neutrino stream = imprinting the behavioral patterns that are fixed for the incarnation = we can rely on them.

With the exception of the HDS and the other information system that will be introduced within (Emanations), there is little information available on how the neutrino stream influences our lives. The HDS is an ancient system of *Behavioral Genetics* that was rediscovered in 1987. Prior to 1987, the last culture to use a comparable system was the Essenes of two thousand years ago, a spiritually advanced sect within the Jewish culture. Jesus was an Essene. The Essenes, and the authentic Jesus movement, were a casualty of the Roman Jewish war of the late first century...when over a million Jews were slaughtered by the Roman legions. The HDS was also a casualty of that brutal conflict.

Emanations introduces an entirely new body of information on the neutrino stream

and its' influence on our lives. Few people are aware of the Emanations discovery. In ways most have never imaged, this booklet provides an introduction to how the neutrino stream defines our genetic behavioral qualities, in addition to affecting our lives every second of every day.

Other information systems integrated in the HDS:

- Binary mathematical structure of physical genetics/DNA
- Chinese I' Ching
- 9 center chakra system
- Astrology
- Energy channels from the Kabala

When we select our physical body or vehicle in our pre-incarnation planning process (PPP), which has a genetic (DNA) or fixed set of physical qualities, we also select a set of genetic behavioral patterns...many of which you are probably not aware of, or of their importance in understanding, simplifying and improving our lives. We select behavioral patterns that facilitate the goals of our incarnation, which we also select during our PPP.

Although there are numerous sources that address our PPP, two of the best are the books by Robert Schwartz, *Your Souls' Plan* and *Your Soul's Gift*. Other excellent sources on our *lives between lives* are the books by Michael Newton, (*Your Soul's Journey* and *Your Soul's Destiny*) and *Conversations with Jerry and Other People I thought Were Dead*, by Irene Kendig. As said by many, ***we are spiritual beings who choose to have temporary human experiences.***

Before the HDS what most people generally did and still do, is develop a lifestyle based on the conditioning of many factors, including the influence of our parents, other family members, friends, teachers, books, business associates, etc., etc., and of course the *values and perceived ideals* of our society.

Our conditioned lifestyles are typically in conflict with elements of our genetic or natural behavioral patterns. The result is that essentially everyone's lives are more difficult, stressful and confusing than necessary. The analogy is that we constantly

struggle to swim upstream, instead of going with the natural flow of our genetic behavioral patterns.

By knowing our natural behavioral patterns, we can concentrate on being the best *we can be* versus *struggling to be what we will never be*. The benefit is that we understand ourselves on a deeper level, which aids us in improving our lives. For example, our genetic behavioral patterns convey our best decision-making technique, referred to as our *Authority*. Would your life improve and be less stressful if you made consistently better decisions, *all of the time*? This is only one example of how an overview of your genetic behavioral patterns, through a HDS reading, will convey techniques and strategies that simplify and improve your life.

Everyone is a blend of potentially positive and negative attributes. However, there is no such thing as a good or bad genetic design because we select behavioral patterns that facilitate the goals of our incarnation. Shifting to our natural behavioral patterns is not an easy transition for most adults because we have lived a large portion of our lives *the way we thought was best versus what comes natural*...plus we tend to resist change. Another issue can be a reluctance to accept our genetic limitations.

*If you are spiritually orientated, there is another layer of information. If you are not...just skip the next three paragraphs.*

The behavioral characteristics and physical body that everyone selects in our pre-incarnation planning process comprise what is referred to as our *temporary human costume*, which is unique for each incarnation. This is not unlike the process an actor goes through when they select a role to play in a movie.

Because most of us strongly identify with the physiology of the human experience (the body/mind or our human costume), **our plan is to intentionally forget our spiritual identity, often referred to as our higher-self or soul. This allows us to experience our temporary human costume and role, oblivious to the bliss of our Spiritual Self = true essence or our conscious awareness.**

Recognizing that the final phase of our *Earthly adventure* is transcending our human costumes and remembering of our true Spiritual Self, the HDS can play a pivotal role. More specifically, *behavioral genetics assists us in distinguishing between our*

*temporary human costume and eternal Spiritual Self.* This assists us in stepping back from (dis-identify) with our temporary human costume, along with the endless dramas of Earth. This is an essential shift in perspective, that is, if we desire to experience the 3<sup>rd</sup> dimension as our true Spiritual Self. This shift towards a *witness perspective* represents a big step towards not identifying with the negative emotions and dramas of the ego-based Earth dimension, while simultaneously manifesting the bliss of the spiritual dimensions (sometimes referred to as 5<sup>th</sup> dimensional consciousness, Oneness Consciousness, enlightenment and/or Christ Consciousness).

In addition to the benefits already mentioned, there are numerous others to educating ourselves on our genetic behavioral characteristics, some of which are as follows:

- With a more thorough understanding of our behavioral characteristics, we are able to implement strategies and techniques that simplify and improve our lives. Such a more educated approach facilitates an easier and less stressful lifestyle. We also increase the probability of accomplishing the objectives of each incarnation (that we selected in our PPP), thereby *reducing the number of incarnations to complete our Earthly experience*. The significance of these benefits cannot be overstated.
- **Parents** reap endless benefits by understanding their children's unique combination of behavioral qualities. Quite frankly, there is probably no better way for parents to obtain insights into their children's behavior than through the HDS. Parental responsibilities can be addressed with a more educated approach, making life easier and more fulfilling for both parent and child. In the process, each child can reap the benefits of the HDS for their entire life.
- **Mental Health Professionals** - The HDS will have a major impact on several professions, including psychiatry and all related mental health professions. Because of the education provided, the HDS redefines and greatly enhances traditional approaches. For example: Some genetic behavioral traits are often viewed as symptomatic of behavioral problems. They are typically treated with well meaning, but ineffective approaches (given the genetic behavioral mechanics of the client). With the insight provided by the HDS, many so-called unusual or problematic characteristics will be recognized as genetic qualities,

which are fixed = cannot be altered. The end result will be a much more educated approach, which will provide clients with more practical and effective strategies for improving their lives.

- **Depression** - Millions that suffer from melancholy and depression seek relief from their doctors and therapists. With the HDS, millions will learn that their struggles are a direct result of their genetic makeup. Simply by identifying those genetically prone to melancholy and depression, which is elementary with the HDS, new and more effective treatment protocol can be implemented. The result is simple techniques can be used to mitigate and/or even avoid the once perceived inevitable periods of depression. In many cases, the endless therapy sessions and regiment of anti-depression drugs can either be greatly reduced or completely eliminated = priceless, life changing information.
- **Marriage counseling** will take on an entirely new approach because the detail of each partner's genetic behavioral patterns will be properly factored into the relationship. The conflicts will be addressed with an understanding each person's natural behavioral patterns, which produce a far more practical and successful approach to relationship issues. Rather than proposed solutions that are in conflict with one or both of the couples' behavioral patterns, strategies that accommodate the behavioral characteristics of both can be formulated.
  - There are also cases where the inherent behavioral patterns and related conflicts are so severe that divorce represents the best course of action. Regardless of the specific circumstances, each couple can make their decisions based on a much more educated understanding of the issues at play.
  - **Pre-Marriage Readings** - There will come a time when HDS *couple evaluations, prior to marriage*, will be commonplace. By obtaining a more educated understanding of the relationship dynamics, each party can make such a life changing decision from a more informed perspective. The long-term potential for the relationship, inclusive of the inherent plusses and challenges, can be discussed and evaluated.

Ultimately, better decisions on whether or not to enter into a marriage will result.

- **Career Selection** - Understanding our behavioral patterns will also play a role in the selection of career paths, which will better compliment rather than conflict with one's behavioral characteristics. The HDS does not guarantee that each career selected will be successful. However, the probability of success will escalate considerably. The positive impact on our society will have many positive ramifications...when a larger percentage of the population is doing what compliments their behavioral patterns, and thus, are much more prone to enjoy and excel at.
- **Authority = How to Make Your Best Decision – All the Time**  
The HDS provides answers too many questions, some of which we did not even know to ask. For example, *would you like to know how to make your best decision, all of the time...and make fewer mistakes? If you made your best decision, all the time, what would happen to the quality of your life?* The HDS communicates what your best decision-making technique is, *all the time*. Consistently better decisions produce a better quality of life.
  - In our fast-paced culture, many of us are conditioned into thinking that fast decisions are the best technique. However, for 49% of the population, using a quick intuitive method is a formula for making the wrong decision at least 50% of the time = ***at least 50% of the time you will make something other than your best decision = unnecessary mistakes.***

The examples of how the HDS can help us individually and collectively are endless. The more knowledge we have about ourselves, our loved ones, and the people that we routinely associate with, the easier and less stressful our lives become. Isn't it time to make our lives more understandable and ultimately improve the quality of our lives? The HDS provides specific and verifiable answers to endless questions regarding human behavior. A small sample of some of the questions include the following:

- Why do sexual behavioral patterns and strategies vary, what are your natural

sexual strategies, and what related characteristics best compliment your personality?

- Why do some of us have a natural propensity towards melancholy and depression from birth, while others do not?
- Why are some of us naturally very social while others are quieter, withdrawn and/or reclusive?
- Why are some of us noticeably more emotional or mentally oriented?
- Why do some of us thrive on a constant stream of new experiences while others are very comfortable in their set pattern of life?
- Why do some people have a constant stream of ideas and concerns about how to solve our larger social problems, while others cannot be bothered with the problems of the world?
- Why do some people have huge egos and others seem to have no ego at all?
- Why do some people have a very fixed way of mentally approaching any subject while others are very open minded and approach different subjects from various perspectives?
- Why do some of us know where and why we are going in a particular life direction, while others never seem to have a confident direction in life?
- Why are some of us good listeners while others are not?
- Why are some people totally at ease in large groups, while others feel awkward and uncomfortable in large social settings?
- Why can some of us meditate into a calm and quiet state when others have a never-ending flow of thoughts?

The HDS has a foundation of quantum physics and mathematics, but also incorporates ancient knowledge. For those interested, the mathematical foundation of the HDS mirrors our physical genetic structure, and this is described later in our discussion. Perhaps more significantly, the HDS recognizes that the neutrino stream plays a huge role in our lives...an influence that humanity could not define and understand until the HDS.

Over the past thirty years, the HDS movement has developed a wealth of educational materials. The HDS is a dramatic departure from traditional models of human behavior...a much more accurate and comprehensive information system if your will. It takes years to obtain a working knowledge, after which life changing insights into

the genetic behavioral patterns of any individual is the result, providing layers of details that were previously unknown. The benefits provided by such a comprehensive understanding is priceless. For example, a *personal reading* from an experienced HDS analyst will communicate many of the most important behavioral patterns and related strategies. Thus, **in a single session, anyone can benefit from the HDS by learning about their most significant behavioral patterns and related techniques for improving their lives.**

A *reading* conveys characteristics and strategies unique to each individual. In other words, the HDS conveys a natural, effective and simplified way to improve our lives. By living consistent with our natural behavioral patterns, we enter an era of more informed, confident and successful lifestyles. Reduced levels of stress and anxiety will be one of the inevitable by-products. There is obviously a huge advantage to living naturally, as we are genetically designed to, versus as we are conditioned to think we should. All of the benefits provide a foundation for a more educated and successful approach to our daily challenges.

Many of us expend considerable time and energy trying to acquire behavioral qualities that are not part of our genetic makeup. Unknowingly, our culture, family, friends, business associates, and even therapists, condition us into trying to be somebody that we simply do not have the qualities to be. Thus, the HDS eliminates the frustrations of trying to emulate behavioral patterns that we do not have. By honoring our natural *behavioral mechanics*, we simplify and improve our lives, while reducing the anxiety and stress we all encounter when we struggle to live contrary to our natural behavioral patterns.

Unlike any other information system, the HDS teaches us the benefits of living within the framework of our natural behavioral patterns. We can also use the HDS to learn invaluable insights into the behavioral patterns of our family members, business associates and close friends. This will provide the foundation to develop more mature, successful and satisfying relationships.

## **Personal Reading**

An overview of your genetic behavioral patterns is referred to as a *reading*, which can be obtained from any Human Design analyst. The ability to provide concise and

practical behavioral information is a talent. How will you know how to recognize a quality reading? If you do not obtain many practical insights into your personality and new strategies for simplifying and improving your life, you will know the reading did not deliver the potential benefits. We have a suggestion for you. Before you go to the time and expense of having a personal reading, consider posing some questions to the HDS analyst that you have selected, such as:

- How long have you been studying the HDS?
- How long have you been an analyst?
- How much time does a typical reading take?
- Can I record the reading (on my smart phone)?
- How many readings have you performed?
- Do your readings include a description of Type and Authority?

You are looking for someone with at least of few years of studying the HDS and experience in providing readings. The reading, or *Overview* as I refer to it, should include your most important behavioral patterns and strategies for everyday life, inclusive of your *Type* and *Authority*. If these two categories of behavioral patterns are not included in the reading, find another therapist. You should find your HD overview as amazing information, which allows you to better understand yourself, while also providing new strategies for improving your life. A list of analysts, their location and contact information can be obtained from [humandesignamerica.com](http://humandesignamerica.com). The international site is [JovianArchive.com](http://JovianArchive.com).

## **Overview Readings with Michael**

For those interested, I provide what is referred to as an *Overview* of your genetic behavioral patterns. My goal is to convey your most important behavioral characteristics and helpful strategies, versus getting lost in the technical minutia of the HDS. To this end, the format used is a refinement of the one taught in the HDS seminars and literature. This new format has been a result of many years of providing Overview readings with one goal in mind: Provide practical behavioral information and strategies that clients can easily grasp...to simplify and improve their daily lives.

As my teacher before me, I tell each client not to take my word for the information. But rather test the techniques and strategies communicated by experimentation and observation of the effects in your everyday life. This approach will prove the accuracy and priceless benefits of the information. **The HDS is not accurate some of the time...it's genetics...it's 100% accurate, all of the time.**

The information that will be conveyed is on the *behavioral mechanics* of the Human Design you selected. The reading begins with a brief overview of your body graph, Gate activations and Definitions (major behavioral patterns).

- There are 64 primary behavioral categories as represented by the Gate numbers on the body graph. For an example of a body graph, please see Deepak Chopra's on page 22.
- The black and red gate coloration on specific Gate numbers on a body graph represent conscious and unconscious characteristics respectively.
- Each of the 26 behavioral activations (Gate #s colored in on any given chart) have both a positive and negative application, which we select on a moment to moment basis via our free will.
- We are a consolidation of the behavioral characteristics dictated by our 26 Gate activations, with the understanding that some play a more prominent role than others. It is my job to identify the most significant behavioral patterns and then, communicate how to take advantage of those qualities.

**Type, Authority, Definition & Profile are the four major categories of characteristics that communicate a meaningful *Overview* of anyone's genetic behavioral patterns...referred to as your *Human Design*.**

- The first portion of any *Overview* will be a discussion of these 4 categories in relation to your specific behavioral patterns.
- The concluding portion of the reading will focus on your Other Significant Behavioral Patterns.

To make the calculations for your HDS chart/body graph, you will need to supply your birth information: birthday, place of birth and time of birth (see your birth certificate). The Overview readings last approximately 90 minutes. Individual, couple and children Overviews are available. My contact information: 970-726-3225 or via email at michael@metatones.com.

## Summary

The HD way of living will probably represent some significant changes to your existing lifestyle. This occurs for one primary reason. **Most of us live our lives based on *how we think we should live versus how we are genetically designed to.*** Thus, most of us live oblivious to the benefits of honoring our genetic behavioral patterns. As previously stated, the suggestion is to verify the accuracy of your Overview by experimentation and observation. This approach will prove to you that you can significantly improve the quality of your life by living consistent with your natural behavioral patterns.

There are many benefits to also becoming educated on the behavioral patterns of the key people in our lives...like learning how to develop and maintain quality personal and professional relationships. Everyone...*everyone, likes to be treated consistent with their genetic behavioral patterns.* A good first step is to simply listen to a recording of anyone's HDS reading...or in the case of my Overviews, I also provided a detailed outline of each Overview reading.

A brief example is a husband or wife learning that *their partner does not like to be told what to do, when to do anything, or how to do anything...because they are genetically designed to prefer to be asked versus being told.* Thus, there is a huge difference between...*Harry, go to the store and buy a carton of milk for the children...versus...Harry, will you go to the store and buy a carton of milk for the children?* What's the big difference you ask? The first way will irritate Harry every time, even if it's only subconsciously...the second will not. Multiply the consistent, irritating effect over many years and you end up with a serious marital problem.

The balance of the discussion on the HDS provides a more detailed and technical introduction. If you are more interested in learning about the Emanations information system, please skip to page 26.

# Details of the Human Design System

## DNA – Physical & Behavioral Duality

When most people think about genetics they usually think about physical characteristics, dictated by the unique composition of the double helix of DNA (deoxyribonucleic acid). This physical side of our genetic make-up has been an area of considerable research for decades. One of the many things that the scientific community has discovered is that the foundation of our genetic composition lay in a structure of binary mathematics. The underlying binary structure of our DNA constructs our entire physical being, right down to the color of our hair and eyes. Genetic research has once again demonstrated to mankind that mathematics is the ultimate language of the universe.

Many of the great teachers down through history have taught that we live in a dimension of dualities. Light/dark, physical/spiritual, right/left, male/female, mental/emotional, night/day, good/evil, etc., etc., are only a few of the endless dualities that make up our environment. The duality of our physical DNA is our *behavioral DNA*, which is contained in our energetic structure. This structure is commonly referred to as the aura, human energy field (HEF) and/or simply our field, which like our physical body, contains many common elements.

Two examples of our fields' common components are our chakra and meridian networks. Another common element of each HEF is the energetic network that contains our genetic behavioral characteristics. It is this energetic sub-structure, and related permutations, that is communicated by the HDS. In HD terminology, the visual representation of each person's behavioral structure is referred to as a *body graph or human design*. For the well-educated, a visual review of each body graph/human design communicates an incredible amount of behavioral information.

The documentation of the HDS originated with my teacher, Ra Uru Hu, who was referred to by his students as simply "Ra". Our culture lost a truly gifted soul when Ra passed in 2011. The mathematical foundation and structure of the HDS highlights that the duality of our physical DNA is our *behavioral DNA*. Consistent with the system of physical genetics, we all draw from a common pool of behavioral qualities

to arrive at a specific and unique combination of behavioral characteristics, which make us all unique from a behavioral perspective. Our genetic make-up (specific combinations of physical and behavioral characteristics) are derived from a common, mathematically based formula. This genetic formula may represent the *ultimate human duality, where both aspects (physical and behavioral) are defined by the identical binary structure*. An applicable statement attributed to Plato is...*God is a mathematician*.

### **DNA - Physical and Behavioral Duality**

Until relatively recently, humanity was unable to use genetics to identify individual characteristics, of either a physical or behavioral nature. It will be documented that the binary structure of the double helix of our physical DNA shares the identical mathematical foundation that also defines our *behavioral DNA*. Our fixed or genetic behavioral characteristics can be calculated and identified by the HDS.

It has been established that the composition of our physical DNA lay within the binary, mathematical structure of amino acids. For a book on the mathematical structure of our DNA, please refer to the *Taos of Chaos*, by Kayta Walter Ph.D. The common structural features and individual differences, within our physical composition, are a result of the unique binary combinations found in our amino acids (within the double helix structure of our DNA). **We will illustrate how the mathematical foundation of our behavioral DNA (as defined by the HDS) is identical to the mathematical structure of our physical DNA.**

The binary structure of our behavioral DNA also mirrors the 5,000 year old information system known as the Chinese I' Ching. This ancient Chinese information system of behavioral characteristics is integrated within HDS. As will be demonstrated, the mathematical structure of our amino acids, which comprise our physical DNA, is also identical to the mathematical foundation of the Chinese I' Ching.

Within the binary structure of the I' Ching there are 64 primary combinations. Within the HDS, these 64 potential mathematical combinations are called *Gates*. Each Gate is associated with specific behavioral qualities and have six additional mathematical possibilities, which are referred to as *Lines*. The 384 (64 X 6) lines represent a more

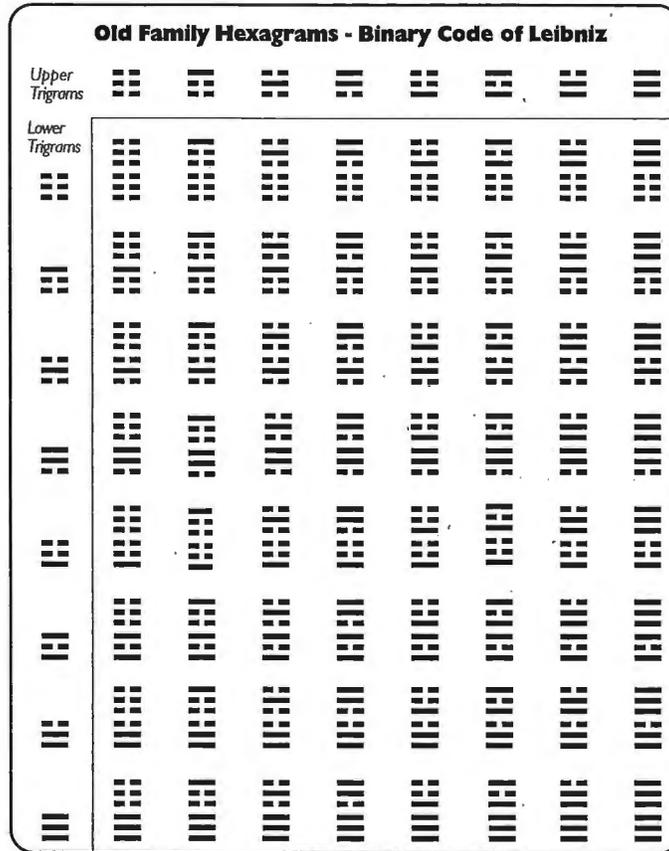

detailed layer of behavioral traits. In addition, within other components of the HDS, there are other possible mathematical permutations, all of which identify additional layers of behavioral information. In summary, the related mathematical permutations of the HDS are almost endless and explain why each one of us represents a unique combination of behavioral qualities. To obtain a book by Ra on the 384 lines, please go to [humandesignamerica.com](http://humandesignamerica.com) and purchase *The Complete Rave I' Ching*.

We will simply scratch the surface of how the mathematical structure of our physical DNA mirrors that of the HDS. For a step by step education on the mathematical duality of our DNA and the behavioral patterns conveyed by the Chinese I' Ching (and the HDS), the book *Taos of Chaos*, by Kayta Walter Ph.D., is recommended.

The starting point for the mathematical parallels between the I' Ching and our physical DNA is the binary equivalent of the symbols for yin - - and yang —. The 64 Gates of the I' Ching are based on the permutations of these binary symbols in what is referred to as trigrams or the various combinations of two sets of three yin and/or yang symbols. Within this trigram configuration there are 64 mathematical possibilities, each of which represents a major behavioral characteristic or Gate in HDS terminology.

## **The Structure of the Human Design System**

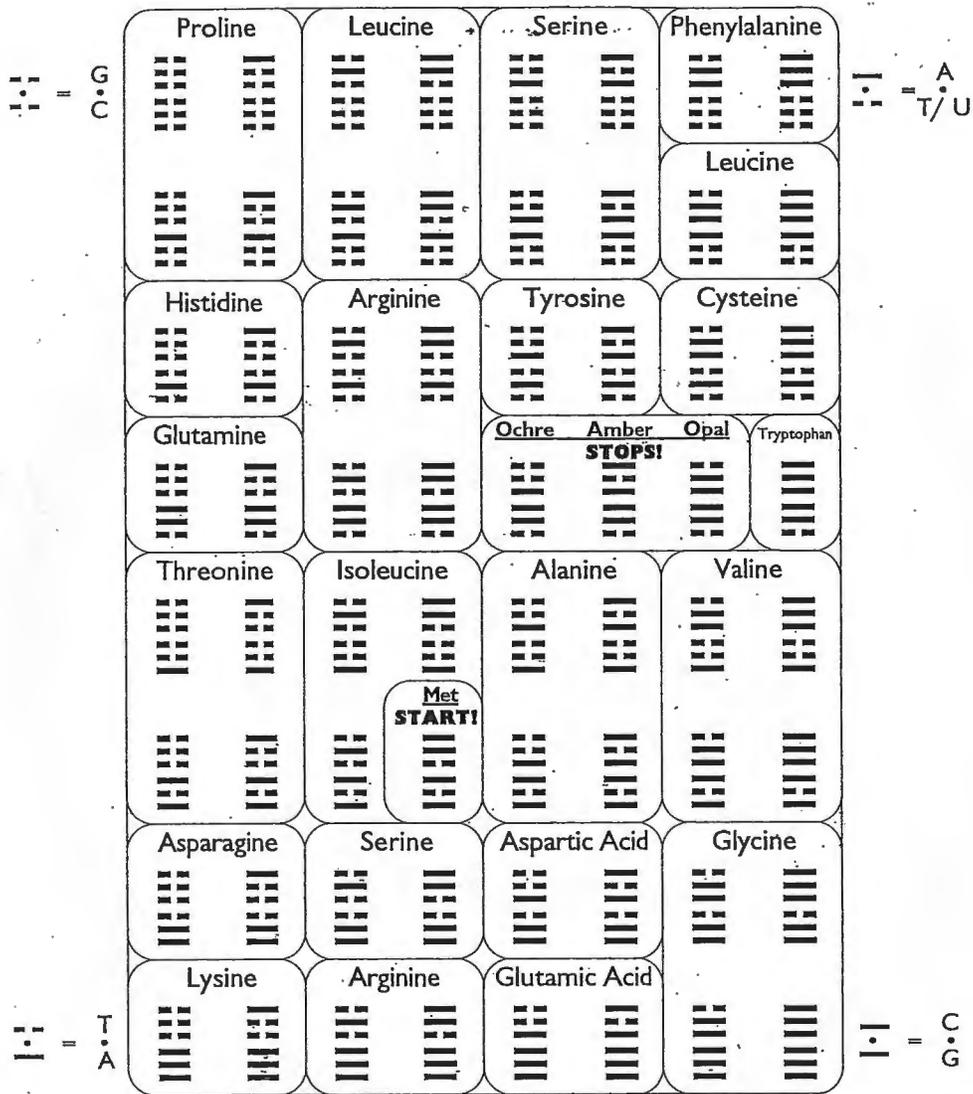

The 64 binary combinations of the Chinese I'Ching (or Gates of the HDS) are reflected on the next page and represent the overall structure of our behavioral DNA. Within this binary structure lays an endless genetic pool of behavioral combinations. These mathematical possibilities convey a portion of the HDS.

Tao of Chaos by Katya Walter Ph.D. page 127

How does the series of 64 combinations parallel the binary structure of our physical DNA? Thanks to the logical explanation of Kayta Walter Ph.D., if the identical yin/yang binary code is applied to the molecular structure of amino acids/DNA we arrive at the chart on the following page.

### DNA Swatch Hexagrams

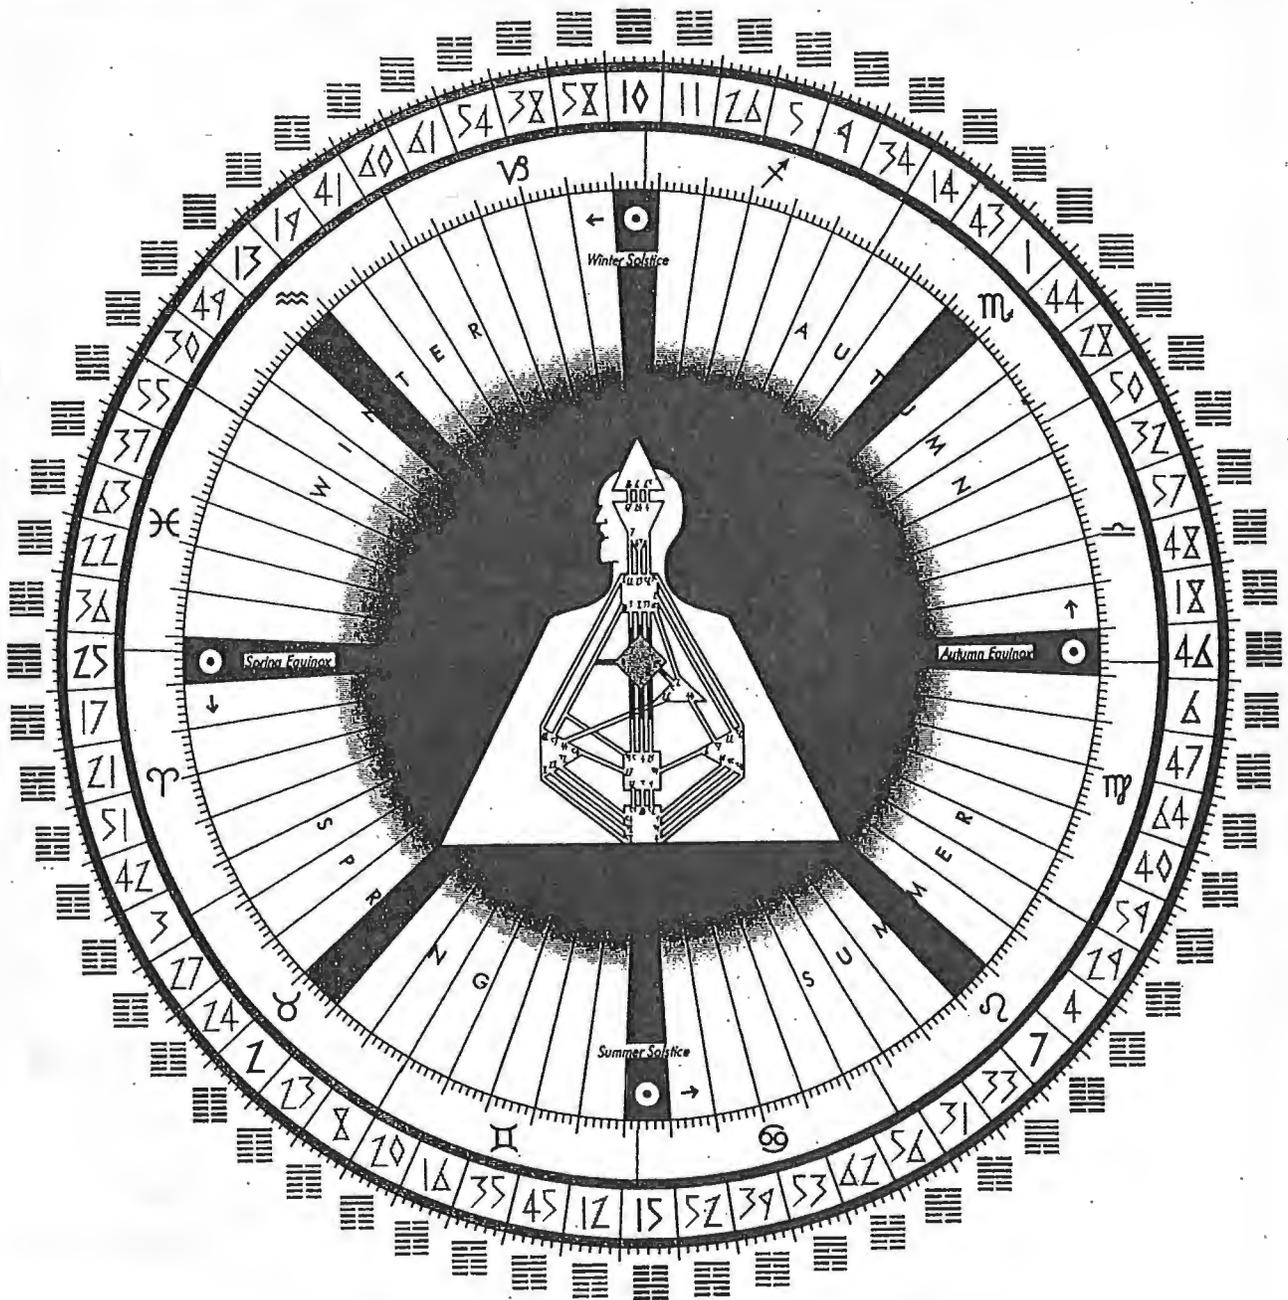

Tao of Chaos by Katya Walter Ph.D. page 166

As illustrated, the behavioral qualities of the Chinese I' Ching, represented by the 64 combinations of the yin/yang binary structure, mirror the identical structure of our physical DNA. As has been proven, our physical characteristics are a result of the unique combination of the binary structure of amino acids (within our DNA).

The next step is to demonstrate how the behavioral qualities of the Chinese I' Ching are calculated and mirror the Gate system of the HDS.

The illustration below is the HDS wheel, which is used to calculate and identify our genetic behavioral characteristics. Each of the 64 mathematical possibilities (Gates in the HDS) has a specific astrological location on the wheel and represents one of the behavioral characteristics of the Chinese I' Ching, along with its DNA equivalent. Thus, even though there is one mathematical structure, there are two genetic outcomes, both of which are integrated into each person: one for our physical DNA and one that defines our behavioral DNA.

A common question is as follows: How can astrology have anything to do with our genetic structure? For the answer, we need to return to the effect of the neutrino stream—that constant flow of billions of neutrinos thru our HEF every second. As the planets in our solar system move, they alter the neutrino stream. **The effect is that the *Gates and Lines* (specific behavioral qualities) that are energetically activated within everyone’s HEF (via the neutrino stream) is constantly changing.**

In relation to our behavioral characteristics, there are two aspects to the ever-changing neutrino stream.

- In connection with each soul’s birth, there is a permanent energetic imprinting of behavioral qualities, in the form of specific *Gates and Lines*. The applicable qualities (or our behavioral DNA) are fixed for the duration of the incarnation.
- As the planets move, they constantly alter the neutrino stream and the related *Gate and Line* activations. ***These temporary behavioral activations effect everyone.*** The counterpart in traditional astrology are referred to as *transits*.
- In summary, our behavioral characteristics are a combination of our birth or fixed genetic qualities plus the temporary activations (and related behavioral characteristics) of the ever-changing neutrino stream.

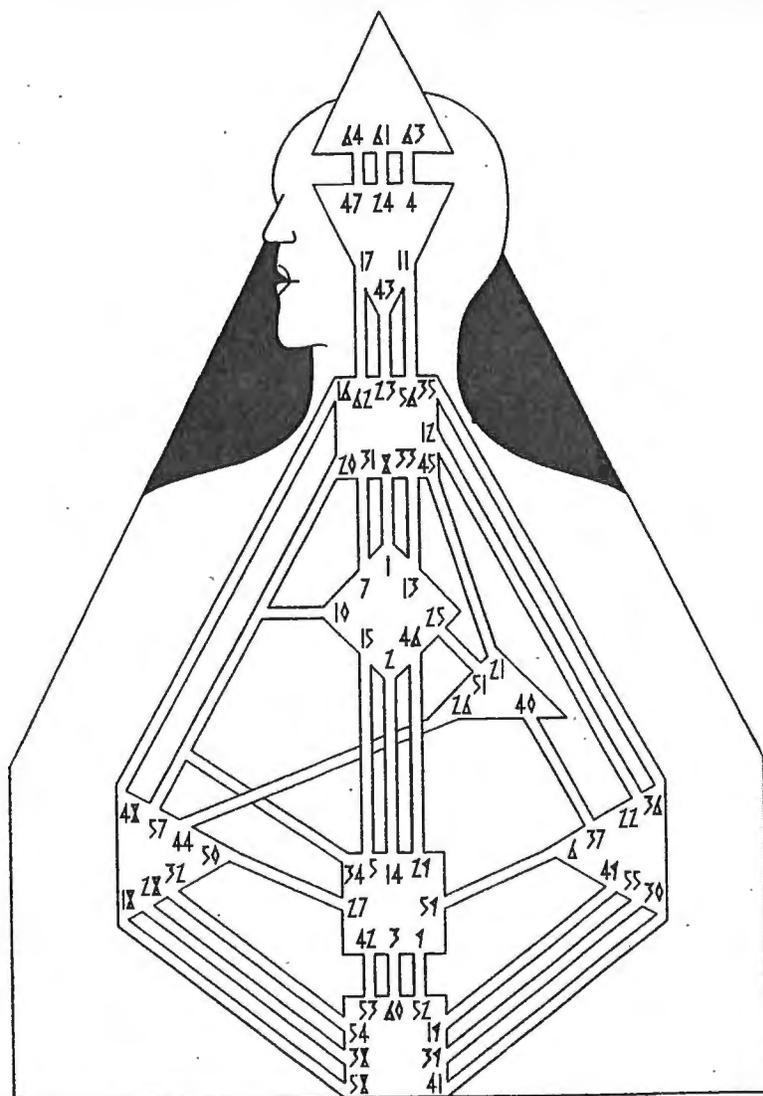

A critical element of the HDS is that our birth activations are fixed for the entire incarnation, which means we can rely on these behavioral qualities. The HDS defines and explains many facets of human behavior, in addition to why we are such complex beings. **One fascinating element of the HDS is that the entire human race is affected by the *temporarily behavioral activations* of the neutrino stream.**

Just as our physical body houses our various organs, which have specific functions, our HEF contains the chakra network. Although many people are familiar with the seven primary chakras, the charka system is far more extensive. Nine of our charkas, along with the energetic connections between these chakras, referred to as *channels*, contain our network of genetic behavioral characteristics.

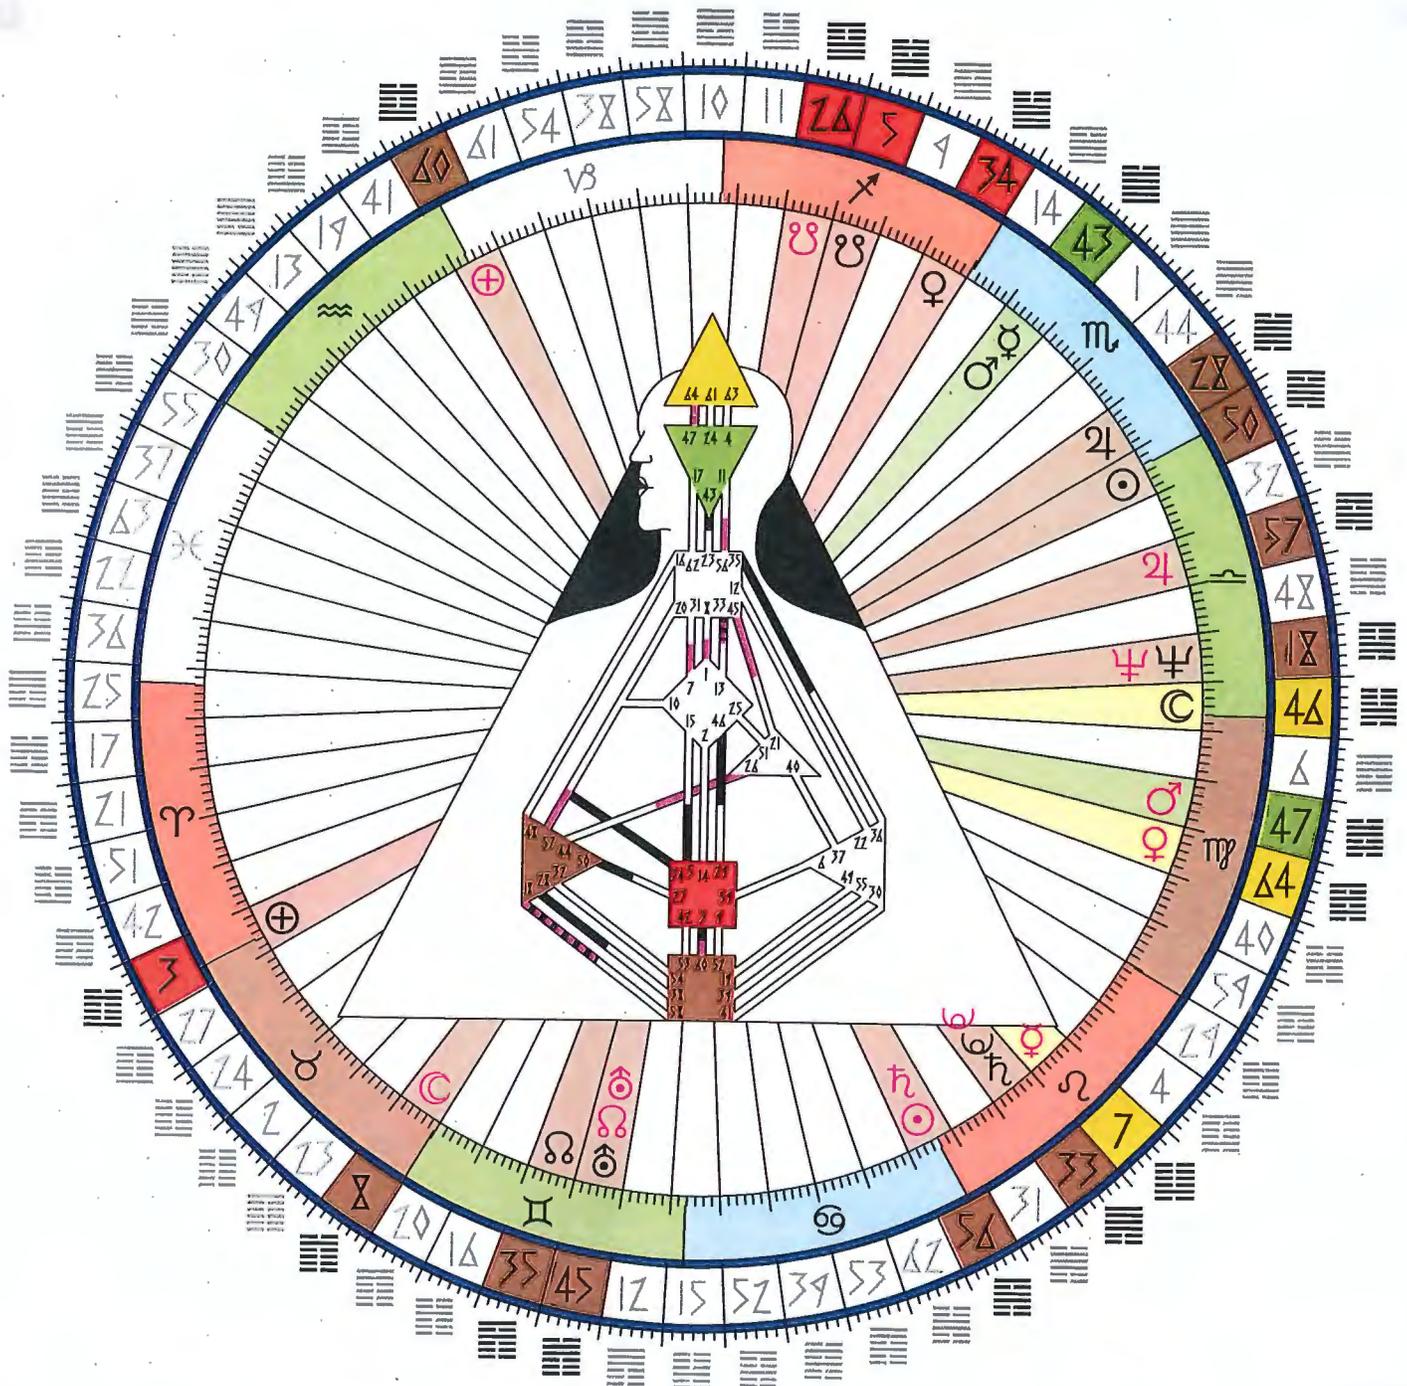

The HDS consolidates a nine-center chakra system, with the energy channels from the Kabala, to create a visual representation, referred to as the *body graph*. As

illustrated below, the 64 Gates of the HDS have specific locations, as do the network of 36 channels that connect the chakras. As defined by the body graph, everyone has a *unique combination of fixed behavioral characteristics*...because of variations in the location and time of birth. **The ever-changing (temporary) behavioral activations of the neutrino stream, combined with everyone's birth or fixed behavioral activations, results in temporary activations that will have a common and yet uniquely different behavioral effect on each HEF.**

The illustration below is a blank Human Design body graft.

The calculations for Deepak Chopra M.D. are reflected below. The HDS body graph is a synthesis of the neutrino stream, astrology, the I' Ching (binary mathematics of physical genetics/DNA), a nine-center chakra system and the channels of the Kabala. As illustrated below, each body graph reflects the 26 birth behavioral activations within the Gate, Line, Channel and Chakra structure.

HDS calculations convey the 26 fixed/birth behavioral activations, which are transferred to the HD body graph. Below is the chart of Dr. Deepak Chopra. Each body graph conveys a considerable amount of behavioral information. A few examples include: Dr. Chopra's has prominent mutative theme and a natural ability to intuitively respond to questions with a considerable amount of new/mutative educational content. He always makes his best decisions when he honors his first, intuitive gut reaction. He has a very busy, abstract mental process, which operates 24/7. His busy mind will compete with and attempt to circumvent his intuitive gut reactions, for control of the decision-making function.

33 <sup>4</sup>	ω	33 <sup>4</sup>

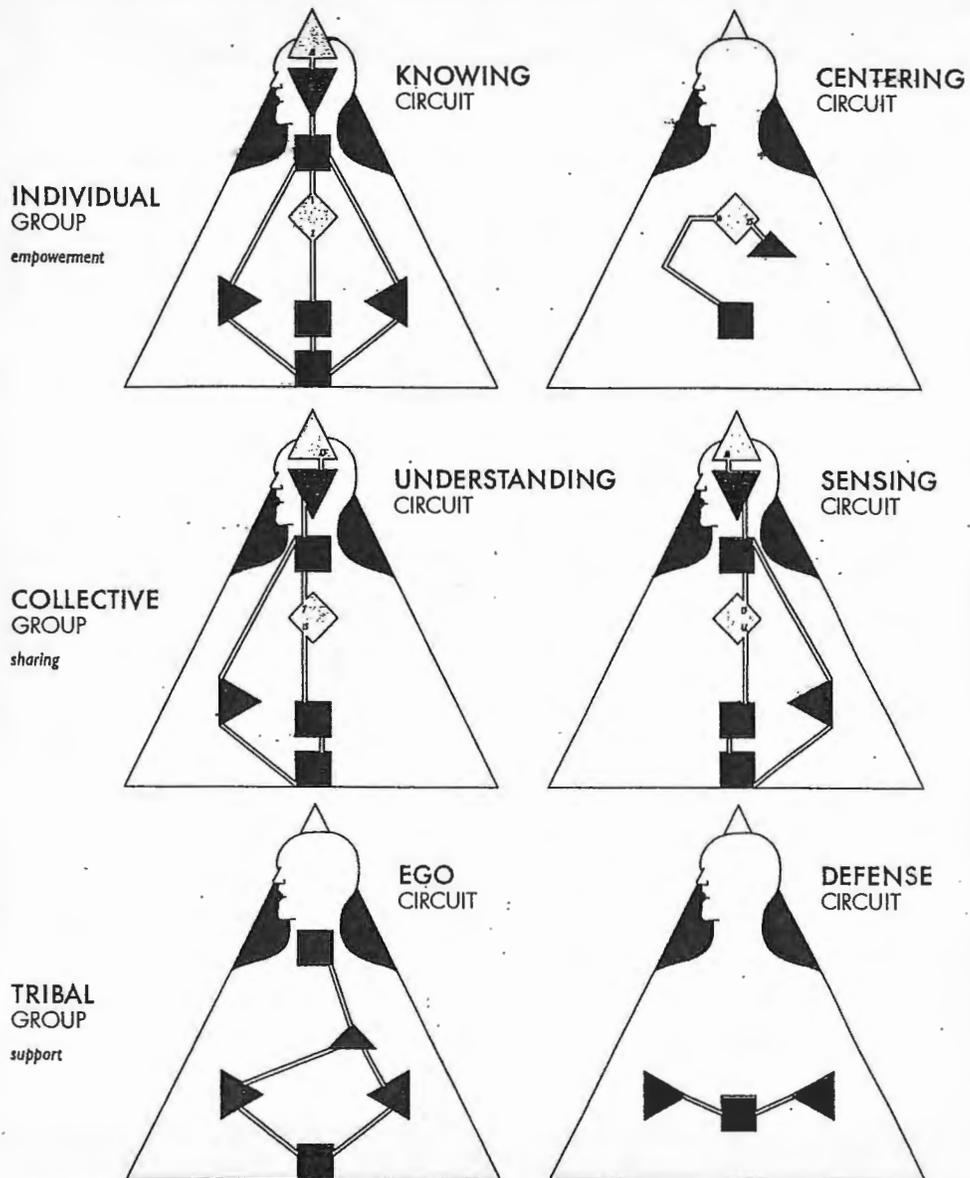

The HDS provides behavioral information that is not available from any other source. The specificity of this information is unparalleled. One feature of the body graph is the nine chakra centers, which are connected *by energetic channels*. Each chakra is a center of behavioral and biological functions that have a relationship with one or more of our physical organs. The Gate activations for each body graph dictates how each chakra center plays a pivotal and unique role in determining the behavioral characteristics and patterns. A broad overview of the chakra centers is provided below.

<u>Center</u>	<u>Function</u>	<u>Primary Organs</u>
Head	Inspiration/stress	Pineal gland
Ajna	Conceptualization	Anterior & posterior pituitary glands
Throat	Communication & Manifestation	Thyroid & Parathyroid glands
G	Self Direction & Love	Liver
Heart	Ego & Will power	Heart, stomach & thymus gland
Spleen	Cleansing, well-being	Lymphatic system
Sacral	Creation & sexuality	Ovaries & testes
Solar Plexus	Emotions	Kidneys & pancreas
Root	Activation & stress	Adrenal glands

Illustration and chart provided by [humandesignsystem.com](http://humandesignsystem.com)

The Gates and Channels of the HDS have common behavioral themes, which form what is referred to as *Circuits*. The Channels and Circuits are responsible for transferring energy and information between our chakra centers. Depending on the unique combination of each set of 26 Gate and Line activations (as dictated by the HDS calculations) the behavioral qualities and patterns will vary by individual. The six Circuits and related Channels of the HDS are reflected below.

For an excellent overview of the Circuits, Channels and Gates, see the booklet *Circuitry* by Richard Rudd, available at [humandesignamerica.com](http://humandesignamerica.com)

Even though the HDS provides priceless information, relatively few people have been educated to interpret and convey our genetic behavioral qualities (HD Analyst), referred to as a Reading. For years I was always amazed in Ra's classes, because there were rarely more than twenty people in the room. I always felt, and still do, so very fortunate to obtain an education on how to understand and improve our lives...from such a gifted and entertaining soul.

The number of mathematical permutations and related combinations of behavioral characteristics is staggering. For example, the possible permutations, using just four of the twenty-six activations, is almost 70,000. Thus, the HDS explains, in considerable detail, why each of us has a truly unique personality.

Our history communicates that any new knowledge takes time to be accepted into the mainstream of our culture. This process is underway for the Human Design System. As a result of the many benefits, the HDS is destined to play a prominent role in our evolutionary journey. For those interested, this knowledge is now available.

## **EMANATIONS – NEXT GENETIC STEP**

There is another life changing information system that only a handful of people know about. The Emanations system provides information that builds on and compliments the HDS. Emanations is the next step in understanding the dramatic, daily effect that the neutrino stream has on all of our lives. Emanations was discovered and documented by a brilliant lady and one of my teachers...Rita Aguirre Ph.D. Emanations educates us on the correlations between our physiological, energetic and behavioral characteristics. In the spirit of the HDS, Emanations represents a new paradigm in understanding the human species. Although an introduction to Emanations is provided herein, it is literally impossible to convey the significance of this discovery without experiencing the benefits on a daily basis.

For over 20 years, Emanations has been verified by experimentation and observation. Even though few people have benefited from Emanations, it is destined to have a huge impact. I have been a student of both the HDS and Emanations for over twenty years. Each have and continue to provide significant benefits to my daily life. The consolidation of these systems, both of which recognize the importance of the neutrino stream, is a life changing way of understanding and improving our lives.

Rita's discovery occurred in the late 1990s. Its foundation is the mathematically based structure of our HEF, as defined by the HDS. However, **Rita discovered an entirely new category of genetic and energetic information. The HDS took a huge step in educating us on the effects of the neutrino stream and Emanations represents a major expansion of *neutrino based genetic information*. Emanations communicates break through correlations between the periodic table of elements, our genetic behavioral patterns and the ever-changing influences of the neutrino stream, on both our physical bodies and human energy fields.** Simply as a reminder, a neutrino is the smallest known particle of matter. Every second, billions of neutrinos flow through each square inch of our fields and physical bodies. Just like Ra's Human Design System, the importance of Rita's discovery cannot be overstated.

Although there are many elements, much of the discovery was a result of Rita consolidating the HDS with the brilliant work of Joseph M. Scogna. Much of Scogna's work on the Period Table of Elements is communicated in his book, *The Promethion – A Comprehensive Study of the Principles of Life Energy*. The Periodic Table of Elements is a record of every element (oxygen, copper, gold, etc.) that comprises everything in the universe.

Emanations tells us that each of the Human Design System's 64 gates is directly associated with at least one of the elements that comprise the Periodic Table. The physical, emotional, mental and energetic influences of these elements, via the research and wisdom of Joseph R. Scogna, are communicated on an individual basis. **With Emanations we are able identify, *on a daily basis*, which HDS gates and elements (from the Periodic Table) are being energetically activated by the neutrino stream. When the term *activated* is used, it means that the neutrino stream is having a very specific effect on each of our human energy fields, in a unique and definable manner. Thus, by consolidating the HDS with Scogna's information on the Periodic Table, Rita discovered an entirely new genetic based information system, dictated by the neutrino stream, which we refer to as *quantum genetics*.**

The information provided by Aguirre's Emanations is staggering...and practical. For example, as dictated by the ever-changing neutrino stream, Emanations communicates (on a daily basis) what the potential effects and symptoms are, in addition to communicating specific vitamin, mineral and homeopathic supplements

to mitigate the applicable symptoms. **It's a life changing information system.** Thus, Emanations allows us to better understand our environment, ourselves, and improve the quality of our lives.

**Emanations allows anyone to identify, on a daily basis, what energetic influences of a physical, mental or emotional nature are potentially going to occur from the neutrino stream.** These ever-changing influences are dictated and defined by three primary factors.

- The specific composition of our HEF, as defined by the HDS
- The periodic table of elements and the corresponding Gate #s of the HDS
- The constantly changing Gate and Line activations of the neutrino stream

Emanations is a system of quantum-based information that has many applications. **Think of Emanations as your personal neutrino stream forecast...that communicates what steps are going to assist you in coping with the constantly changing physical, mental, and emotional effects of the neutrino stream.**

Emanations provides information to anyone that wants to *master* their unique genetic composition, by educating us on the effects of the constantly changing neutrino stream. From a practical perspective, with the new information provided by the HDS and Emanations, many of the struggles of everyday life can be identified and addressed. The medical profession will never be the same once a full understanding of the HDS and Emanations is integrated into our medical sciences.

In addition to communicating the daily effects of the neutrino stream, it also conveys the ongoing effects of our 26 birth-elemental activations. **The elemental birth activations and related pressure points, over the span of a lifetime, often cause many of our most significant *elemental imbalances and symptoms.*** These genetic or birth elemental imbalances are often exasperated by the ever-changing neutrino stream. In this regard, the strength of the most potent neutrino activations (via the Sun/Earth, which account for 70% of the neutrino stream) can be used to identify the cause of specific symptoms and how to best treat them.

**It is significant to note that birth elemental imbalances tend to intensify as we age, which simply means that an early and long-term mitigation protocol would benefit**

**most of the population.**

Another benefit of this windfall of information is related to the Metatones technology and the growing number of individuals that will have particularly refined and synchronized energy fields. **As our fields become more synchronized with the zero point field, we become more sensitive to the effects of the ever-changing neutrino stream. Long-term users of Metatones, that actively pursue the purification of their HEFs, will feel and thus, be more aware of the daily impact of the neutrino stream on a level they could never have imagined.**

The sensitivity of our fields gradually increases as we go through the purification process = purge energetic/karmic imbalances and blocks = moves any HEF towards synchronization with the ZPF. For a discussion of this purification process, please see the Past Life Self Regression & Dissolving Karma booklet at [metatones.com](http://metatones.com). Thus, the physical, emotional, mental and spiritual impact of the neutrino stream, which most people are oblivious to, will gradually become more noticeable. Regardless of whether we use vibratory therapies such as Metatones, to synchronize our fields with the zero point field (ZPF), supplemented by PLR and LBL practices, or whether we choose the historically slower evolutionary approach, the destiny of humanity is the synchronization of our fields with the zero point field. **In summary, as our fields proceed through the synchronization process with the ZPF, the importance of the information supplied by the Human Design System and Emanations will escalate exponentially.**

To obtain insight into the significance of Emanations, one needs to gain an understanding of the HDS, the information contained in Joseph R. Scogna's book, *The Promethion – A Comprehensive Study of the Principles of Life Energy*, and an energetic understanding of the dynamics of the astrological wheel. Scogna's book is available at [lifeenergyresearch.com](http://lifeenergyresearch.com). This represents the first step, in a longer process, to fully appreciate the significance of Rita's discovery. As more people begin to appreciate the significance of the Emanations discovery, we plan on offering more information on how to apply Emanations in everyday life.

A brief example may be the best way to demonstrate *one way* that Emanations can be a benefit to humanity. Before the example, let us repeat some HDS information that applies to Emanations.

Earth travels at a speed of over 300,000 miles per hour in its orbit around the sun. The sun and all of the planets are also moving at incredible speeds. Because the neutrino stream is altered by all astrological movement, it is not a static influence on our existence. *In other words, the energetic influence of the neutrino stream, which passes thru us every second, in the form of billions of neutrinos, is constantly changing.* Just as the location of astrological bodies affect the neutrino flow at the time of our birth, and *activate the genetic behavior qualities for the duration of the incarnation,* the constant movement of the astrological bodies and the related impact of the neutrino stream also *temporarily activates other behavioral qualities...and thanks to the knowledge provided by Emanations, the neutrino stream is also constantly activating elements of the Periodic Table...that correspond to the specific Gates of the HDS!* By any standard, this is life changing information.

Think of the neutrino stream as an energetic imprinting on our human energy field, with some of the imprinting as permanent and some temporary. Thus, the behavioral qualities which we manifest every moment of every day is ever changing; a combination of the permanent behavioral qualities we obtained at birth plus the temporary qualities being activated as the neutrino stream changes. **This is one of the major reasons why our lives are so complex, because the neutrino stream literally alters our behavioral patterns from moment to moment.**

This dynamic is why it is so important to identify and understand (via the HDS) the behavioral qualities that are a constant in our lives = our birth activations. Once identified, *these permanent behavioral qualities can be relied on...all the time.* All of these principles also apply to the new genetic-based information supplied by Rita's Emanations. **Because each of the 64 Gates of the HDS also manifest the effects of at least one element from the Periodic Table, and *potential symptoms of imbalance,* a major new layer of quantum based genetic information is revealed.** When all of the information from Emanations and the HDS is consolidated, it represents a huge amount of knowledge to absorb. This information is priceless because it provides a wealth of information on how to better understand and improve our lives.

Onto a simple Emanations example. On the top of the next page is a chart from the HD Ephemeris for part of June. It communicates the behavioral qualities, by Gate and Line number, being activated as the neutrino stream shifts each day. **When people**

**hypothesize about a *universal program* that energetically conditions all of us, they are spot on, because that is exactly what the neutrino stream does.**

On the ephemeris chart, we have circled June 13<sup>th</sup> to June 18<sup>th</sup> Gate 11. This means that Gate 11 was activated by the neutrino stream via the Earth. Also review the body graph Dr. Deepak Chopra. Note the channel on the right side of Dr. Chopra's neck, between his ajna and throat chakras. Whenever the Channels are activated (Defined in HD terminology), signified by both Gates being colored in red (unconscious) or black (conscious), they provide a constant flow of energy and information between the applicable chakras...which activates all the related behavioral characteristics.

In Dr. Chopra's case, there is a constant flow on energy between the crown and ajna chakras (via activations in Gate 64 & 47). One effect of this energetic flow is that *pressure* is being applied to the normally dormant gate 11. The pressure on Gate 11 is accentuated by his activated Gate 56. Wherever there is a dormant Gate between an activated chakra and Gate, as in the case with Dr. Chopra's Gate 11, a *pressure point* is created. Whenever Gate 11 is activated, this will relieve the pressure via the energetic connection to the throat chakra.

For this six-day period, due to the location of the Earth, Gate 11 was activated within Dr. Chopra's field, along with everyone else's, via the neutrino stream. On the next page you will locate the Emanations chart. Please locate the element associated with Gate 11: Nitrogen. Given Dr. Chopra's HDS chart, and the pressure point of dormant Gate 11...Gate 11's activation represents an energetic change that will effect Dr. Chopra more than most. This new influence or effect of the neutrino stream is temporary but potentially significant. The energetic impact may manifest in the form of behavioral, physical, mental and/or emotional effects for Dr. Chopra. Excluding behavioral considerations and the impact on Gate 56, to determine what effects/symptoms Dr. Chopra may experience by the temporary Nitrogen activation, the Scogna information on Nitrogen needs to be reviewed.

**NITROGEN** (From The Promethion by Joseph Scogna)

### **Organ & Gland Influences**

Nitrogen activity takes place in all cells of the body but is activated from the outside toward the inside of any organism through the very first stages of digestion. The pancreas, the liver and the stomach are involved in breaking down nitrogenous compounds and then absorbing them for what is needed by the body for energy. The organs of elimination are expressly programmed to eliminate the toxic build-up of nitrogenous wastes through the kidneys and the colon. It is in the colon that the exact charge balance between the carbon-nitrogen cycles is corrected. The absorption of water and compounds of carbohydrates are measured and tested against the amount of nitrogenous substances that invade the diverticula of the colon.

The continuous natural nitrogen cycle of the Earth, which provides the gaseous material that composes about 4/5 of the breathable air in the atmosphere, is the radiational (decay) portion of all living matter. Nitrogen constitutes the basic negative balance of all proteins and helps to build protoplasm. Nitrogenous compounds are found in all living material and are positioned against oxygen and hydrogen to create a balance of growth and decay within the body.

Bacteria that live in the soil accomplish the action of nitrogen fixation. These bacteria

Consolidated by Rita Aguirre, Ph.D.

### METATONES

break down the electric pressure of complex nitrogen compounds into simple nitrogenous substances, which can be ingested by plants more readily. The bacterial process by which decaying matter is absorbed balances the electric charges within the plants so that they will be fit for human consumption. Simple vegetation is already primarily balanced in the correct proportions to the human body because of nitrogen fixation. The death and decay (nitrogen cycle) of humanoids and other organisms on the planet re-nitrogenizes the soil. The breakdown of nitrogen in the soil is accomplished by the action of small insects that prey on dead matter. Bacteria ingest this dead matter, which helps to fixate nitrogen in its proper electric charge balance in the ground that plants can then absorb.

### **Symptoms of Imbalance**

The types of clinical symptoms that result in the imbalance of nitrogen are found in all the chronicles of medical science. Sickness is merely a disturbance of the carbon-nitrogen cycle. When nitrogen is imbalanced in the human being, the body becomes very irritable and painful. There may be sensations of a tight band around the head, and the person may become very sensitive to noise. There may be sharp stabbing pains in every part of the body. The tongue may become ulcerated and heal very slowly. There may be great burning pains when urinating; the elimination of fecal matter may be difficult and painful. **Rheumatic and arthritic conditions may be caused by upsets in the nitrogen cycle of the body because all the degenerative ills of mankind are a direct result of a rapid decay or disintegration of the body's healthy tissue.** (We have highlighted these possible symptoms because we will be returning to them for our example.)

**The greatest and most feared conditions such as cancer, arthritis, heart disease and diabetes are directly associated with (long-term) overloads of nitrogen in the system due to protein breakdown.** The production of all painful symptoms and decay comes directly from the vacillation of the body tissues toward the nitrogen end of the cycle. It is this end of the cycle where the organism moves towards decomposition so that the body can be turned into fertilizer for the future generations to come. All manner of insects and pests seem to bother a person's body when he is leaning toward the nitrogen end of the cycle. Essentially, it is the job of these pests to break down the body even further so that it can be made ready for its final task – to supply the soil with nitrogenous substances so that new life may grow

from it. This description may seem horrid, but it is a fact of life that all organisms, which become sick or disabled, move more rapidly toward the nitrogen end of the cycle and become fodder for the living, healthy organisms that must carry on the progress of mankind.

The disruption of the nitrogen balance of the body brings with it a rapid upset of all enzyme and hormonal systems, for it is nitrogen which maintains a steady balance of electric pressure to balance that of the positive pressure of hydrogen. The cause of any aging in the body is that of imbalance in the charge pressure and its immediate reaction tends to trigger the inequity of nitrogen on the system.

It is thought in many circles that the supply of nitrogen to the body is insufficient in sick people and must be replenished. Thus, were born the super high protein diets that supplied vast amounts of nitrogenous amino acids to the body. This may seem a necessary step, but as a consequence, the addition of more nitrogenous substances only accelerates the aging process. The correct procedure to balance the body in conditions of high nitrogenization is to apply substantial amounts of carbohydrates to keep the body from propelling toward decay. These carbohydrates should be complex and not of the sugary or the simple type, which are quite unstable. Finally, nitrogen imbalance causes a great deal of depression in the mind, for there is always the feeling that nothing can be done about the condition. Nitrogen, when upset, seems to promote the idea of hopelessness to the body. The rectification of the nitrogen level in the body is the primary step in returning someone to health.

## **Balance Recovery Procedures**

### **Minerals**

**Carbon:** The balance of nitrogen depends almost exclusively on the stability of carbon. Carbon is the monarch of electric pressure equity on the body, and together with the formation of water (hydrogen and oxygen), regulates the activity of nitrogen.

**Mercury:** Mercury is one of the most mysterious elements on the earth. Its harmful properties check the nitrogen balance because both substances vie for ultraviolet decomposition in the same medium. In the presence of mercury, nitrogen is more

stable. This is not to recommend the ingestion of harmful liquid mercury; it is more a statement of charge balance between these two elements. Although modern science has yet to discover a useful purpose for mercury in the body, it is true that the right electric pressure level of mercury is part and parcel of the human system.

**Calcium and potassium:** The maintenance of electric balance falls into the realm of these two elements when dealing with the effects of nitrogen imbalance. Calcium maintains the firmness of the skeletal system in the face of overt decomposition by nitrogen excess, while potassium regulates the smooth transition of electric pressures as elements taken in quantity are efficacious in the event of nitrogen upset.

### **Vitamins**

Nitrogen works well with folic acid and many other electronegative supporters such as B2, B3, vitamin C and PABA. Because nitrogen is an intricate part of all amino acids, the interplay of vitamins depends on whether the imbalance is positive or negative. When nitrogen is in excess, the fat-soluble vitamins, A, D, E, K and F should be used along with vitamins B1, B6, B12, and pantothenic acid. When nitrogen levels are less than what they should be, which indicates high carbonization and crystallization of enzyme systems, the vitamins that support nitrogen should be used.

### **Herbs, Foods, other Life Forms and Homeopaths**

**Sepia** (the juice of the cuttlefish): when taken in diluted doses, sepia helps to balance and maintain carbon-nitrogen integrity. It has been known to eliminate the weaknesses and sensations brought on by nitrogen imbalances, such as hot and cold flashes, jaundice, emptiness, dizziness and a deadly feeling of being left completely alone.

**Caladium Sequinum** (American Arum): This preparation handles motion sickness, which might be caused by excesses of electronegative elements on the body. This herb alleviates more of the sensations associated with protein consumption. It stabilizes hunger cravings and flutterings in the stomach and the knot-like feeling hypoglycemic patients experience when they have over-consumed protein.

**Lac Canium** (Dog's Milk): A preparation of this material, diluted to specifications, may

handle depression, cracking in the joint of the jaw, **soreness, stiffness**, and specifically swollen glands and throat. It has been used to alleviate the encroaching metabolic upsets of **arthritis and other similar diseases that are the result of inflammations, swelling and sporadic pain.**

(End of Promethion Information)

By consolidating the HDS and Emanations information, there can be an incredible number of practical applications for Dr. Chopra, depending of course on the specific symptoms that arise from the activation of Gate 11 - Nitrogen. Any nitrogen imbalance will be short lived because this activation is only for 6 days. Consistent with The Promethion information on nitrogen, let us assume that Dr. Chopra experiences a minor condition associated with a nitrogen imbalance in the form of arthritis. Based on the Promethion, the use of the homeopath La Canium will help minimize or eliminate this temporary arthritic condition. This brief example hopefully provides a glimpse into the significance of the information available from Emanations.

There are many other facets and potential benefits to the information provided by Emanations. As simply one example, the constant *long-term* pressure on Gate 11 (when there is no temporary Gate 11 activation) may also result in symptoms caused by a Nitrogen deficiency or excess of Indium (Gate 56). Both scenarios and possible symptoms will be long-term. In addition, **the prominence and severity of the symptoms will tend to increase as Dr. Chopra ages.** This reality presents an entirely new component of the Emanations information, along with information on how to successfully treat Dr. Chopra. When this example is applied to more chronic conditions and/or to humanity as a whole, we begin to get a glimpse into the magnitude of the Emanations discovery.

**On a personal note, based on over 20 years of using Rita's Emanations, inclusive of verifying the accuracy thereof, via experimentation and observation, it is an accurate and practical guide to the ever changing physical, mental and emotional influences of the neutrino stream.** All of the related benefits have been priceless and not available through any other source. *Thank you* Rita, for providing this valuable resource to humanity.

## **SUMMARY**

The Human Design System and Emanations contain their own unique peripheral philosophies. Although the philosophies differ, both contain verifiable core mechanics and knowledge that provide profound insights into our lives. Two of the common characteristics of both systems is that they expound the uniqueness of each human energy field and the huge effect of the ever-changing neutrino stream. Thus, an ideal lifestyle and formula for optimum health, for each soul, is truly unique.
